● Introduction

動機：

由於近年新冠肺炎疫情爆發，為了減少面對面傳染的風險，許多國家多採用線上教學以及開會等方式進行活動，但經過觀察後，我們發現有關於料理的這部分的教學方式，多僅止於影片，且料理大部分屬於烹煮類型，較少飲料等類型，料理缺乏多元化。

Motivations:

The new coronavirus outbreak is continuing to grow. To decrease the risk of infection by face to face, several countries adopt online teaching and meeting to carry on the activity. However, after the observation, we found out that relating to cooking this part of the teaching style is mostly demonstrated by video clips. And most of the cuisines are classified as a cooking category. Only a few of them belong to drinking. Cooking lacks diversification.

目的：

為了降低傳染的風險，課程幾乎都被改成線上教學，但那些課程散亂又缺乏完整性，我們想要提供一個有多種料理教學影片，也有完整教育系統的平台。在過去的教學模式，如果那堂課有很多學生，學生就可能不能清楚地看到料理過程，但如果學生透過線上教學參加課程，就算有再多的學生，他們也能清楚的看到過程。

Objectives:

To decrease the risk of infection, lectures are almost modified to online teaching, but those courses are messy and short of integrity. We want to provide a platform that has various cooking teaching videos and also has a complete education system. In the past the teaching pattern, if the course has a lot of students, then students maybe can't watch cooking flow clearly, but if students attend courses through online teaching, even if there are more students, they can watch the flow more clearly.

功能：

- 1.若購買課程，即享有免費食材
- 2.開放討論區共同討論
- 3.提前預約上課日期
- 4.上課時能錄影，若不懂能重複觀看
- 5.依照能力或其他不同需求，可分成不同老師授課

Online cooking

Functions:

1. If you buy the course, you will have free ingredients of the cooking class.
2. Free discussion on cooking.
3. The date of the course can be reserved.
4. You can use screen recording to review again after the teacher finish teaching.
5. According to the ability or other requirements to choose the course you want.

利益：

1. 不會有群聚感染的風險
2. 上課內容能得更清楚
3. 上課時間較彈性
4. 不用到教室也能上課
5. 能自行下載教材或影片

Benefits:

1. Less risks of cluster infection
2. Allow to see the course more clearly
3. Able to learn course during leisure time, you can use your time flexibility
4. You can learn anywhere you want
5. Free downloaded online learning materials and video

Research on Online Cooking Learning Platform System 線上烹飪教學系統研究

這是一份探討線上課程消費者購買因素的研究問卷。由於近年新冠肺炎疫情爆發，為了減少面對面傳染的風險，許多國家多採用線上教學以及開會等方式進行活動，但經過觀察後，我們發現有關於料理的這部分的教學方式，多僅止於影片，且料理缺乏多元化，像是大部分料理屬於烹煮類型，飲料等類型則為數之小。基於上述原因我們想藉由您提供的寶貴意見，來製作一個更親近使用者並有趣的烹飪平台。

本問卷不記名，答案無對錯，內容僅供學術參考，絕不對外公開，敬請放心填答，在此先衷心地感謝您的支持與協助。

For the design of this online cooking course platform, if we want to design an operation mode that makes people feel novel and like it, in fact, it must take a lot of time.

In addition to the basic functions like course purchase, course browsing, course comment and discussion, our members think the course platform can add material ordering function and recipes resource share area to increase additional value of our platform. Through the questionnaire we collected, we got some advice on function, like some people say that they want to learn simple cooking. I think we can use a fixed rating standard to arrange the difficulty level then presented to the visitors. Then some questionnaire respondents are curious about the calories of the dishes. I think we can also analyze the calories of the dishes and present them, or use the amount of calories to make search label classification.

I think this project is more biased towards the thinking of the marketing industry. It is necessary to think about the needs of consumers in advance, and we also explain the motivation in the introduction. In response to the impact of the new crown epidemic, there are fewer opportunities for people to meet, and we just look at it. There is a huge demand for online courses, and from this, I hope to develop a more complete and more diversified online course system.

First of all, we started to think in the link of Event Table and Glossary, in this system, what functions are needed by consumers. After comparing with the old online courses, we found that most of the functions of the old online courses can only hear the instructor's voice and screen sharing. Therefore, we have added the function of the student (consumer) discussion area, so students can discuss with each other when they encounter difficulties. In addition, in order to meet the needs of consumers, we have also added the function "Evaluate the courses/videos" after class to improve the lack of the system.

Secondary, after predicting the function, we converted the function we expected into a questionnaire to see if anyone was interested in our system, and at the same time in the questionnaire, we asked whether the function of my system was attractive. After the questionnaire results, we found that most people now emphasize health, so we added the "Browse the Calories" function to the original Event Table and Glossary. After that, we also added the "Course/videos sorts" function, so that consumers can find courses.

Finally, we turn our system into a "Use Case Diagram", and I think this part is the most difficult and time-consuming, because we have not drawn this kind of system analysis diagram, and this is what I think is the most difficult part of this project. The important place is the focus of our learning in the classroom.

This project was born from scratch, and I feel it is amazing, and the process is not smooth, but under the guidance of the teacher and the division of labor of the team, I am gradually familiar with this kind of thinking system. Thinking about how to attract consumers more, I also slowly think about what the future generations need. This project is very interesting. I hope that there will be more opportunities to try in the future.

I think it's difficult to come up with something that no one else has done. If you have an abundant life or participate in many activities, it will be easier. Our online cooking course platform should be practical because everyone can try cooking at home during the epidemic.

Questionnaires were not as simple as I imagined, I often have negligence when thinking about the problem.

After the experience, I know discuss with the team members after thinking is the fastest way to solve the problem but it was quite interesting to get other people's opinions. I learned from the questionnaire that it is very important to complete things step by step. If people miss what did not do or did not do well, the result will be bad.

I hope I can choose more similar courses to learn more knowledge.

After finishing almost all the course, I finally know that studying the Department of Computer Science and Information Engineering course is too difficult for me. Not because of the English-taught program but the bits of knowledge the professor taught during the class. I am the only one who is from the other departments. However, the professor takes care of me a lot. She asked me did I choose the wrong course at the beginning of the semester. I said no, for I want to learn more from other departments. And during the class, she will come and asked me that do I have any problem with the course.

After few classes, I learn many things. Since it is a compulsory subject for other classmates, tons of classwork and homework were required. It is worth studying this course although it is a tremendous challenge to me. After finishing the final project, I benefit a great deal from it. We learn to operate an Online Cooking Learning Platform

System by ourselves. Our teammates cooperate to make the event table and glossary from scratch. This is a domain that I never tried before. It challenges me a lot. The questionnaire I have done many times in other courses so I have some experience of it. Nevertheless, we have few problems with the questionnaire and the professor helped us to solve them again and again. I also learn to draw the use case diagram by myself.
